

# How to import a project from a remote Git repository

Go to File-Import - then following

Get the URI from the repo (for instance  
[https://github.com/CNUClasses/327\\_project2\\_starter.git](https://github.com/CNUClasses/327_project2_starter.git) )  
Copy into the following

**Import Projects from Git**

**Source Git Repository**  
Enter the location of the source repository.

**Location**

URI:

Host:

Repository path:

**Connection**

Protocol:

Port:

**Authentication**

User:

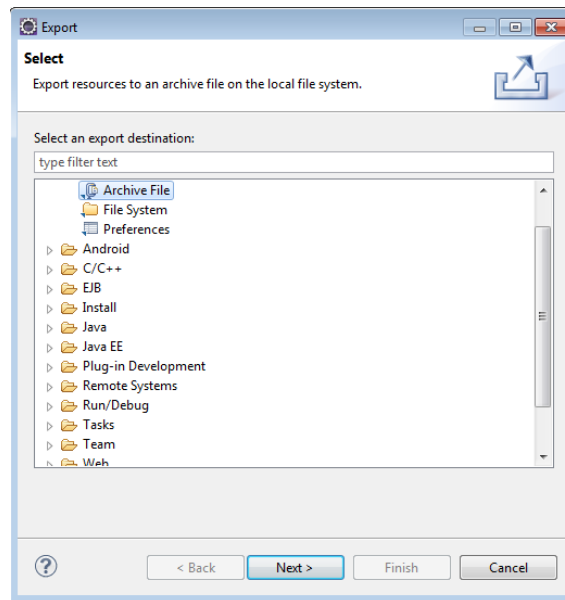

Password:

☐ Store in Secure Store

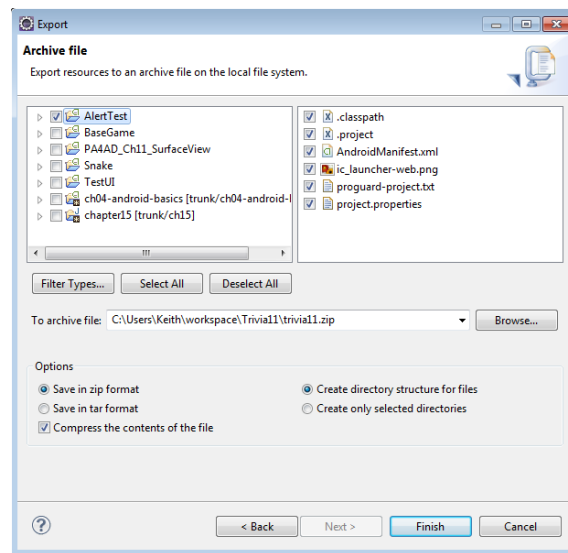

And then follow the prompts

# How to export and import a project from/to eclipse

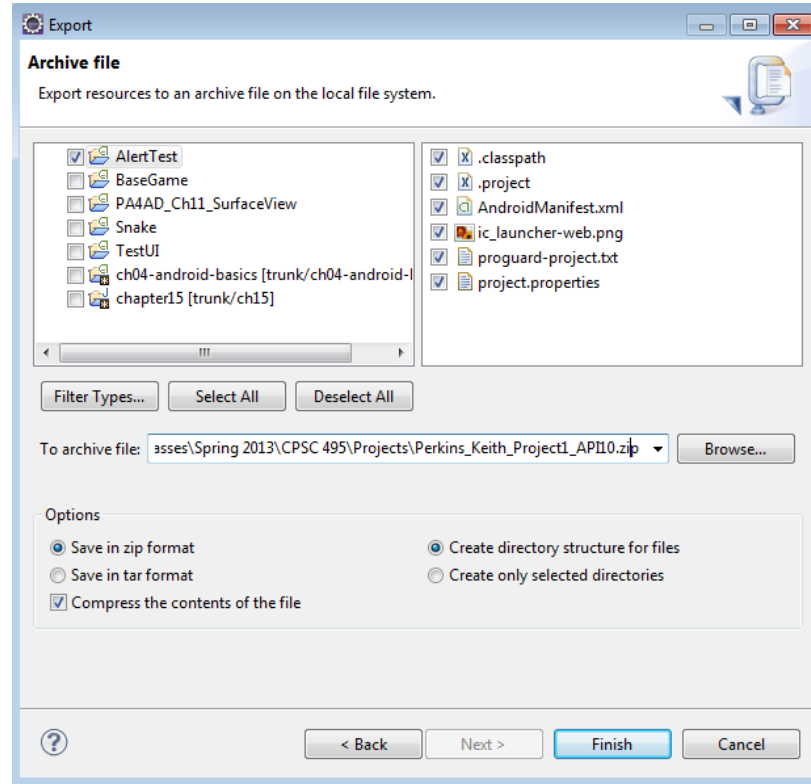

## 1. Go to File->Export

## 2. Choose General->Archive File, click Next

3. Choose the project (in this case AlertTest). Type in the archive filename (see below) and then click Finish.
4. Please use this format Lastname\_FirstName\_ProjectNumber.zip. For example this is my export for this project; Perkins\_Keith\_Project2.zip

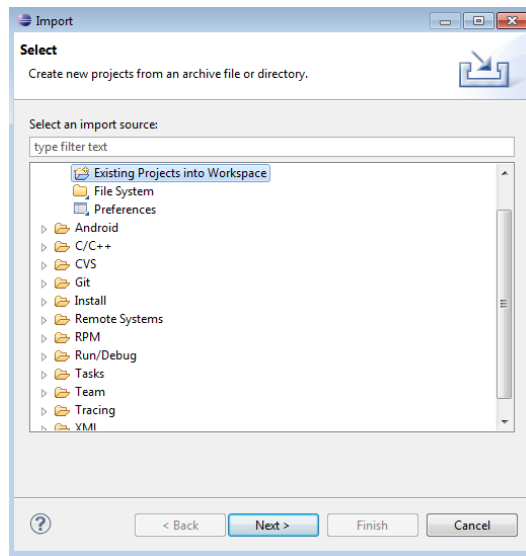

5. Submit your zipped file through scholar.

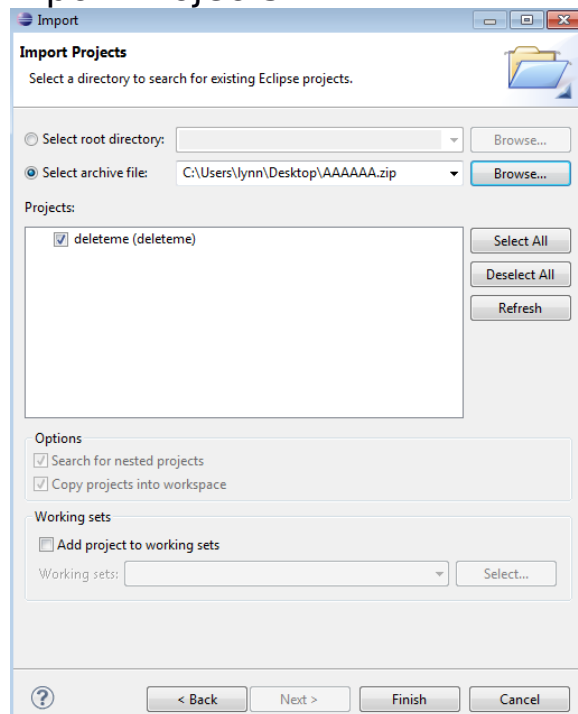

# Importing a Project

Please use this method to verify your archive as its the one I will use when importing your projects to grade.

1. Go to File->Import-> Existing projects into workspace  
(NOT an ARCHIVE FILE)

2. Import Projects

3. Click Finish
